

Profile

I'm a passionate gamer and aspiring Game Developer who enjoys creating impactful experiences and continuously improving my skills in Unity, C#, and other programming languages.

Inspired by my lifelong love for games, I pursued Game Development and have grown through the guidance of my lecturers and peers, aiming to contribute to the gaming industry and inspire future gamers.

Education

2023 - Present

Singapore Polytechnic

- Diploma in Media, Arts & Design. Specialization in Animation & Games, Immersive Media Track.
 - Co- Curricular Activities (SP Life Arts)
 - Class Representative for Year 2 Semester 2 Class AG05

2017 - 2023

Delhi Public School International School

- Completed IGCSEs

Projects

Jan 2026 - Mar 2026

Rats and Roombas - 2 Person Group [Unity 3D]

- Rats and Roombas is a 2 person Co-Operative Game where two players control two rats and collect food before the time limit, while avoiding AI Roombas.
- Worked as a programmer responsible for player movement, enemy AI, teleportation, collision knockback, life systems, collectibles, and unique player abilities.

Jan 2026 - Feb 2026

I Want To Go Home... - Individual [Unity 3D]

- I Want To Go Home... is a single-player VR simulation where the player, a Singapore Polytechnic student, must help a classmate find their lost items before finally heading home after a long day.
- This was an individual PC VR simulation project using a school-provided template, where I implemented mechanics such as object dragging, dialogue systems, and timers to create a more immersive experience.

Oct 2025 - Jan 2026

Too Cube - Individual [Unity 3D]

- Too Cube is a single-player cube puzzle game where the player is split into two souls in an alternate dimension and must solve puzzles to become whole again.
- This was an individual project where I independently programmed the level layout, player movement, puzzle mechanics, and UI.

Nov 2025 - Dec 2025

Santa's Delivery Simulator - Individual [TikTok Effect House]

- Santa's Delivery Simulator is an AR TikTok filter endless side-scroller where the player controls Santa, delivering gifts while avoiding obstacles.
- This was my first experience with visual scripting in TikTok Effect House, where I implemented Santa's movement, obstacle spawning, score tracking, UI, and collision systems.

Oct 2025 - Dec 2025

Balloon Joyride - Individual [Unreal Engine 4]

- Balloon Joyride is a single-player endless runner where the player collects balloons to fly higher and earn more points.
- This was an individual project and my first experience with Unreal Engine 4, where I implemented player movement, obstacles, scoring, coin/magnet/balloon collection, and the flight system.

Oct 2025 - Mar 2026

Elementra - 8 Person Group Work [Unity 3D]

- Elementra is a magical fantasy fusion-based puzzle-strategy tower defense game for PC.
- As a programmer, I was responsible for core mechanics including enemy AI, tower targeting, damage systems, unique tower abilities, and tower placement mechanics.

Apr 2025 - Sep 2025

MAD Over You - 8 Person Group Work [Unity 2D]

- MAD Over You is a 2D otome game with Balatro-inspired card game elements.
- I worked as an artist and game designer, responsible for creating the game's art assets.

Experiences

Dec 2025

Singapore Comic Con

- Event Booth Assistant for WIP Lab on behalf of SP Life Arts

Jul 2024 - Aug 2024

Habitat For Humanity Canada

- Volunteering - Customer Service, Handling Donations, Operating Warehouse Equipment, Inventory Management, Maintaining a Clean and Safe Store Environment

Nov 2023 - Dec 2023

Singapore Comic Con

- Helped build a MAD cutout on behalf of SP MAD
- Event Booth Assistant for SP MAD
